About NextEra Agro Corporation

CORPORATE OVERVIEW

NextEra Agro Corporation is the dedicated contract agro-farming arm of Meekoo Industries Limited — established to build India's most traceable and technology-enabled organic food supply chain. By integrating **solar agri-energy infrastructure** with **certified organic farming**, NextEra creates a revolutionary dual-productivity model: clean energy generated above ground, premium organic crops cultivated below.

With 2,000+ partner farmers across India's richest agro-belts — Kashmir, Kerala, Tamil Nadu, Rajasthan — NextEra delivers guaranteed income, technology access, and global market linkage to farming communities that have historically been exploited by middlemen and market volatility.

Core Business Activities

ACTIVITY 01

Contract Organic Farming

Pre-harvest contracts with guaranteed premium prices lock in farmer income before seeds are sown. Expert agronomists manage crop planning, input supply, and compliance to EU & USDA Organic standards.

ACTIVITY 02

Solar Agri-Energy Integration

High-efficiency solar PV modules installed above crop rows generate clean grid energy while protecting crops from excessive heat. Dual productivity from a single plot — renewable income alongside organic yield.

Spices & Herbs

Dry Fruits & Grains

Oilseeds

Vegetables

Saffron & Cardamom

Solar PV Installation

Grid Energy Revenue

Crop Heat Protection

Shared Energy Income

ACTIVITY 03

IoT Precision Agri-Tech

Real-time IoT sensor networks, drone crop auditing, and AI-driven analytics transform every partner farm into a data-driven operation — maximising yield, minimising waste, and ensuring continuous compliance.

Soil Sensors

Drone Audits

Smart Irrigation

AI Yield Prediction

Digital Farm Passports

ACTIVITY 04

Global Organic Procurement

Certified organic produce collected at grading centres with instant digital payment to farmers — bypassing all middlemen. Product fed directly into Meekoo's global export pipeline for 30+ countries.

EU Export

US Export

Middle East

SE Asia

Zero Middlemen

Farmer Income Streams

Fixed Land Lease

Guaranteed annual income from land leased to NextEra — regardless of crop outcome

Agri-Business Profit Share

Defined share of NextEra profits flows back to partner farmers digitally and transparently

Solar Energy Revenue

Share of clean energy income generated by solar panels installed on partner farm land

Family Employment

Up to 2 family members on full corporate payroll with EPF, healthcare & career growth

The Partnership Process

01

Onboarding & KYC

Digital contracting in farmer's own language. Plain-language terms. No fine print.

02

Smart Crop Planning

Soil mapping, climate data, and market demand matched to tailored crop selection.

03

Active Auditing

IoT sensors and drone audits ensure continuous EU & USDA organic compliance.

04

Instant Payment

Graded produce collected at centres. Digital payment issued same day. No middlemen.

Core Values

SIX PRINCIPLES · ROOTED IN TRUST, RISING WITH INNOVATION

Organic Integrity

EU & USDA Organic — not as a label, but as an uncompromising standard of practice.

Farmer Alliance

This is not extraction. Farmers are equity stakeholders, not contract labourers.

Dual Productivity

Solar energy above, organic crops below — maximising value from every acre.

Data-Driven Farming

IoT, drones, and AI — every farm decision backed by real-time intelligence.

Full Traceability

GPS-tagged digital farm passports from soil to shelf — blockchain-ready supply chain.

Sustainability First

Agro-forestry buffers, reforestation, and zero-chemical commitment protect ecosystems.

Community Impact

Rural Education
Scholarships & school infrastructure for children in partner farming villages

Health Clinics
Mobile health clinics and basic healthcare for farming communities

Women Empowerment
Priority employment & training for women in farming communities

Reforestation
Agro-forestry windbreaks planted at field margins for biodiversity
